MongoDB	PGAdmin 4
Postman	PostgresSQL

Recent Projects
―――――――――――――――――

Maternity Market
maternity1150.firebaseapp.com

Angular 4 / Typescript / Firebase
AngularFire 2 / jQuery / Bootstrap

- Conceptualized an online community for families who need to buy, sell, or trade baby or maternity items
- White-boarded site-wide wireframes and database structure
- Designed and styled User Interface across all pages
- Built form validation and user authentication
- Stored, retrieved, updated, and removed users, items, and images
- Worked with a team in-person and with GitHub to meet a final deadline

Likelihood
likelihoodweb.herokuapp.com

HTML / JavaScript / CSS
jQuery / Bootstrap / Heroku

- Conceptualized a probability app that calculates the user's likelihood of being born in their part of the world in their birth year
- Ran user-provided information through functions using data retrieved from a World Population API

Education
―――――――――――――――――

Eleven Fifty Academy - *Accelerated JavaScript Program 2017*

- Built web-apps using JavaScript, Angular 4, and React
- Built and maintained PostgreSQL, MongoDB, and Firebase databases
- Attended day-length workshops on various topics such as Security, Design, and UX
